WHY I PUBLISH MY NEW PICTURE.

My friends have urged me to print my latest picture, because a number of seedsme.. (shall I call them men?) have assumed women's names in order to sell seeds.

It is a peculiar thing in this day and age, that a man should want to masquerade in woman's clothing. It has not seemed necessary to me to particularly emphasize the fact that I am a woman and that I conduct my own business. I have devoted my best energies in the past eight years to building up this business, and I have been successful. I have proved that a woman can do business.

I do not advise a life of business for any woman where it can be avoided. It means self-sacrifice. It means giving up many of the joys of hearth and home. I love flowers and I know that they make woman and the home (these two words are inseparable) happier and better; they brighten the dark pathways of life.

I have always desired to sell Flower Seeds as cheap as any of the large houses, have always been careful to send out only such seeds as I knew were sure to grow and blossom, and my reward has been the patronage of a large proportion of the flower loving women of the country.

Thanking you in advance for your valued orders, which shall have prompt and careful attention,

I am very sincerely yours,

CARRIE H. LIPPINCOTT.

CLEOME PUNGENS.

THE GIANT SPIDER PLANT.

A robust plant, growing vigorously four to five feet high, unaffected by wind or weather, and flowering profusely and continuously for months. In fact, it is a *perpetual bloomer*, the spikes continuing to increase in size as the plant grows, until they reach upward of two feet in length. The flowers are very showy, bright rose color; grows freely from seed sown in the open ground, thrives luxuriantly, and blooms all summer, no matter how unfavorable the season may be. Sweet Scented Pansies.

SWEET SCENTED PANSIES.

The Perfume of the Violet. The Beauty of the Pansy.
This new class is the result of crossing the Pansy (*viola tricolor*) with the Sweet Violet (*viola cornuta*); the resulting hybrids, in addition to retaining the delightful Violet Perfume, produce the most beautiful Pansy-like blossoms, 2 to 2½ inches across, of great substance and of an endless variety of colors. They are not all equally fragrant, though the majority are as highly scented as the sweetest Violet, and the other high merits of this new strain, aside from their perfume, destined them to wide popularity. Mixed colors. **Pkt., 100 seeds, 6 cts.**

Marella A. Whitlock, Davenport Center, N. Y., April 16, 1898.—The seeds I had from you last year grew very nicely, especially the sweet pea and pansy.

FIRE KING PANSY.

This novelty comes almost absolutely true, scarcely a plant bearing flowers at variance from the type, which is very distinct and striking. The three lower petals each have a large blotch of deep brown-red or magenta, margined with yellow, while the upper petals are of a bright reddish-brown, of a *real fiery shade*, warranting the name FIRE KING. Pkt., 100 seeds, 4 cts.

SNOW QUEEN PANSY.

Pure satiny white with yellow dot in center of flower, sometimes marked near center with faint blue or purple lines; altogether the least picturesque of any of the different classes of Pansies; it is very highly prized by a great many pansy lovers for just that reason. Pkt., 100 seeds, 4 cts.

METEOR PANSY.

NEW CENTAUREA MARGUERITE.

The most Fragrant and Longest-Keeping Cut
Flower.

One of the most valuable introductions of late years. The flowers are the size of a medium Carnation, freely produced on long stems, which renders them valuable for cutting; color pure white, pale sulphur yellow and lavender. The flowers are sweet-scented, and their lasting quality after being cut is remarkable. The plants grow about eighteen inches high and are of the easiest culture; from spring sown seed they commence to flower in July and continue until late in the autumn. This novelty is entirely distinct from all other Centaureas, and undoubtedly the most beautiful variety known.

Heliotrope is a universal favorite on account of its delightful fragrance and duration of bloom, flowering equally well as bedding plants in summer, or as pot plants in the house during the winter. Seed sown in the spring makes fine plants for bedding out, and are as easily grown as verbenas.
